BARRAMATT

Item No. 90.163.022 10 L canister

- High quality and load-resistant coating
- Excellent service life on all water-resistant types of floor coverings
- Very good levelling, high filling performance, short drying times
- Non-slip performance
- Very good matt properties
- Very well suited for floor coverings in sports halls, tested according to DIN 18032_2
- resistant to surface disinfection - limited as to restancy of hand-disinfection agents

APPLICATION RANGE:

For all water-resistant floor coverings. Suited for the optimal surface protection of rubber, PVC and linoleum floor coverings, of unpolished natural and artificial stone, of epoxy resin floorings and of hard and industrial floorings.

INSTRUCTIONS FOR USE AND DOSAGE:

Use Barramatt only on thoroughly cleaned and dry floor coverings. For the restoring and thorough cleaning of the surface, we recommend Lin Compact, Power Strip Neutra or Solex. Shake well before use. Switch off all sources of heat or turn them down. Ensure good ventilation. Apply Barramatt in 2-3 coats. Each coat must dry thoroughly by itself. The consumption rate of the product is approx. 12.5 - 25 ml/m² per coat (depending on the absorptive capacity of the substrate). The dry protective film can be consolidated by polishing, several days after the application (also suited for high-speed polishing). The restoration of a surface can be carried out, after dirt has been removed, by the application of a 1:10 - 1:1 diluted Barramatt solution in a smooth wiping application carried out carefully. In the case of very porous coverings e.g. linoleum, it is recommended that a polymer base coat or Barramatt diluted with water in a ratio of 1:1 is used. After the first coat and the subsequent drying of the surface, smoothen the linoleum by the use of a rotary disc machine and a suitable pad. For maintenance cleaning of the surface, we recommend e.g. Blue Star, Severa Sky, Premium N^o 4 or Prodomo Klarwischpflege.

The safety data sheet for this product is available on demand. The product must only be used as intended and must be kept away from children. For additional information, please refer to the associated product information sheet.

Shake well before use until no residue can be seen at the bottom of the canister.

TECHNICAL DATA:

Form: milky white liquid
Odour: fresh
Density: 1026 g/l
pH-value in delivery state: 9

INGREDIENTS:

Contains: perfumes, preservatives, BENZISOTHIAZOLINONE
Gis code: GE 10
Stability: at least 1 year in original containers, protect against frost
The surfactants contained in this preparation comply with the biodegradability criteria as laid down in Regulation (EC) No. 648/2004 on detergents.

LABELLING: not applicable

According to EC-regulations or the corresponding national regulations the product does not have to be labelled.

TRANSPORT:

No dangerous good in sense of these transport regulations (ADR).
